

Assessment 2 Information

Subject Code:	TEC303	
Subject Name:	Mobile Development	
Assessment Title:	Development and Video Entry	
Assessment Type:	Coding and Video Entry	
Assessment Length:	4	Mins (+/-10%)
Weighting:	40 %	
Total Marks:	40	
Submission:	MyKBS (Moodle Assignment)	
Due Date:	Week 9	

Your Task

For this individual assessment, you will develop a simple android application. You will deploy the app in an emulated environment and debug any errors and re-deploy if necessary.

Assessment Description

This assessment is designed to test your ability to design and develop a simple Android application using an open-source development framework (Android Studio) and your ability to communicate between application activities. You will be developing a two-activity (screen) app to get a basic report about the user's fitness training workouts.

You will be provided with a short case study which will require you to develop a basic mobile application consisting of two different activities, which you must implement data passing between these two activities.

Note: You will need to design and develop the application using Android Studio (Kotlin Programming Language).

Case Study:

Alice and Rohan went to a personal fitness trainer to improve their health. After assessing their fitness requirements, the trainer advised them to do some training exercises each day for a recommended duration as follows:

- Running for at least 60 minutes.
- Cycling and Swimming for at least 30 minutes each.
- Weightlifting for at least 10 minutes.
- The total duration of the combined exercises should be at least 150 minutes.

Alice and Rohan want to do the calculation using a mobile app and need to know whether they achieved their target or not. They have hired you to design and develop an app for their android mobile phones so that they can enter the duration of the performed workouts and get a report. To provide them with their preferred solution, you need to design and develop a two-activity android app as outlined below:

Screen 1: Take user input (Activity)

- The user should be able to enter the duration of the workouts via various UI input components. There should be dedicated input fields for each of the workouts.

Note: The total duration of the workouts should not be taken from the user, however you may choose to calculate and show it as the user fills up the duration for the other workouts.

- There should be two buttons:
 - 'Reset' button to reset the user input, and
 - 'Get Report' button to navigate to the second screen.

Screen 2: Detail report (Activity)

- Shows a detailed report about the workouts performed and whether the targets for individual and total workout have been achieved.

Note: To produce a quality solution, you will implement some chosen UI components, implement user input validation, pass the information captured in the first activity to the second activity.

This assessment aims to achieve the following Subject Learning Outcomes:

LO2:	Design and develop a mobile application via the use of an open-source development framework.
LO3:	Deploy and debug a mobile application using the Android mobile operating system.

Assignment Instructions

1. Read the case study provided and interpret the application requirements.
2. Select an approach to implement data passing between activities.
3. Design and develop an Android App in Kotlin Programming Language using Android Studio that meets the specifications outlined in the case study.
4. Prepare a video to present the app's functionalities.
5. Submit your video presentation and code (zipped) to the designated submission platform by the due date.
6. Refer to the assessment marking guide to assist you in completing all the assessment criteria.

Important Study Information

Academic Integrity and Conduct Policy

<https://www.kbs.edu.au/admissions/forms-and-policies>

KBS values academic integrity. All students must understand the meaning and consequences of cheating, plagiarism and other academic offences under the Academic Integrity and Conduct Policy.

Please read the policy to learn the answers to these questions:

- What is academic integrity and misconduct?
- What are the penalties for academic misconduct?
- How can I appeal my grade?

Late submission of assignments (within the Assessment Policy)

<https://www.kbs.edu.au/admissions/forms-and-policies>

Number of days late	Penalty
1* - 9 days	5% per day for each calendar day late deducted from the total marks available.
10 - 14 days	50% deducted from the total marks available.
After 14 days	Assignments submitted more than 14 calendar days after the due date will not be accepted and the student will receive a mark of zero for the assignment(s) unless special consideration, reasonable adjustment or an alternative factor related to compassionate circumstances is approved and applied.

**Assignments submitted at any stage within the first 24 hours after the deadline will be considered to be one day late and therefore subject to the associated penalty.*

Length Limits for Assessments

Penalties may be applied for assessment submissions that exceed prescribed limits.

Study Assistance

Students may seek study assistance from their local Academic Learning Advisor or refer to the resources on the [MyKBS Academic Success Centre](#) page. Further details can be accessed at <https://elearning.kbs.edu.au/course/view.php?id=1481>

Generative AI Traffic Lights

Please see the level of Generative AI that this assessment is Level 2 has been designed to accept:

Traffic Light	Amount of Generative Artificial Intelligence (GenerativeAI) usage	Evidence Required	This assessment (✓)
Level 1	<u>Prohibited:</u> No GenerativeAI allowed This assessment showcases your individual knowledge, skills and/or personal experiences in the absence of Generative AI support.	The use of generative AI is prohibited for this assessment and may potentially result in penalties for academic misconduct, including but not limited to a mark of zero for the assessment.	
Level 2	<u>Optional:</u> You may use GenerativeAI for research and content generation that is appropriately referenced. <i>See assessment instructions for details</i> This assessment allows you to engage with Generative AI as a means of expanding your understanding, creativity, and idea generation in the research phase of your assessment and to produce content that enhances your assessment. I.e., images. You do not have to use it.	The use of GenAI is optional for this assessment. Your collaboration with GenerativeAI must be clearly referenced just as you would reference any other resource type used. Click on the link below to learn how to reference GenerativeAI. https://library.kaplan.edu.au/referencing-other-sources/referencing-other-sources-generative-ai In addition, you must include an appendix that documents your GenerativeAI collaboration including all prompts and responses used for the assessment. Unapproved use of generative AI as per assessment details during the content generation parts of your assessment may potentially result in penalties for academic misconduct, including but not limited to a mark of zero for the assessment. Ensure you follow the specific assessment instructions in the section above.	✓
Level 3	<u>Compulsory:</u> You must use GenerativeAI to complete your assessment <i>See assessment instruction for details</i> This assessment fully integrates Generative AI, allowing you to harness the technology's full potential in collaboration with your own expertise. Always check your assessment instructions carefully as there may still be limitations on what constitutes acceptable use, and these may be specific to each assessment.	You will be taught how to use generative AI and assessed on its use. Your collaboration with GenerativeAI must be clearly referenced just as you would reference any other resource type used. Click on the link below to learn how to reference GenerativeAI. https://library.kaplan.edu.au/referencing-other-sources/referencing-other-sources-generative-ai In addition, you must include an appendix that documents your GenerativeAI collaboration including all prompts and responses used for the assessment. Unapproved use of generative AI as per assessment details during the content generation parts of your assessment may potentially result in penalties for academic misconduct, including but not limited to a mark of zero for the assessment. Ensure you follow the specific assessment instructions in the section above.	

Marking Criteria ____ 40 marks	F (Fail) 0-49%	P (Pass) 50-64%	C (Credit) 65-74%	D (Distinction) 75-84%	HD (High Distinction) 85-100%
Functionality (User Input) ____ 8 Marks	The application does not meet the specified requirements.	The application partially meets the specified requirements.	The application mostly meets the specified requirements.	The application meets all the specified requirements.	The application exceeds the specified requirements, demonstrating exceptional functionality.
Functionality (Buttons) ____ 8 Marks	The application does not meet the specified requirements.	The application partially meets the specified requirements.	The application mostly meets the specified requirements.	The application meets all the specified requirements.	The application exceeds the specified requirements, demonstrating exceptional functionality.
Functionality (Show Details) ____ 8 Marks	The application does not meet the specified requirements.	The application partially meets the specified requirements.	The application mostly meets the specified requirements.	The application meets all the specified requirements.	The application exceeds the specified requirements, demonstrating exceptional functionality.
Code Quality ____ 4 Marks	The code is riddled with errors and lacks adherence to coding conventions.	The code contains some errors and does not consistently follow coding conventions.	The code is mostly error-free and adheres to coding conventions.	The code is virtually error-free and follows coding conventions consistently.	The code is exceptional, with no errors and strict adherence to coding conventions.
Video of App Functionalities	No video provided or video is not relevant.	The video is of limited quality, with a	The video is of basic quality, with a	The video is of high quality, with a	The video is of exceptional quality, with a

____ 8 Marks		demonstration of limited app functionalities.	demonstration of basic app functionalities.	demonstration that covers a wide range of scenarios for app functionalities.	demonstration that covers all possible scenarios for app functionalities.
Input Error Handling ____ 4 Marks	The application lacks proper error handling and error messages.	Basic error handling is implemented, but with limited error messages.	Effective error handling is implemented, providing meaningful error messages.	Advanced error handling is implemented, covering a wide range of scenarios, and providing informative error messages.	Comprehensive error handling is implemented, covering all possible scenarios, and offering user-friendly error messages.
